Activity Title: iPad Drawing

Objectives:

- Fine motor skills/ hand-eye coordination
- Teamwork and cooperation
- Creativity

Materials:

- iPad for each pair

Methods:

Facilitator Preparation

1. Download iPad drawing application (Drawing Pad or Color & Draw are both good apps) onto iPads before the activity.
2. Make sure to fully charge the iPads before the activity!
3. Make sure each pair of participants has an iPad with the app opened up.
4. Match a child with an adult to work in pairs.
5. Help instruct participants during the activity on what to do and how to use the iPad.
6. Print out the completed drawings and display the art around the room!

Intergenerational Participants

1. Have pairs sit together at the table and have the iPad between them.
2. Pairs should discuss what they want to draw or color and work together to complete their drawing.

Special Considerations

1. New technology can be intimidating for the young and old! Make sure to offer help if a participant seems confused or uninterested.

Key Conversation/ Facilitation Questions

- Has anyone used an iPad before?
- What are some things that are easier to do now with new technology?
- (For the adults) What was the first piece of new technology you remember having to learn?
- What do you think are some future technology inventions that you would like?

Extensions and Themed Activities

- Any theme can be applied to this activity! If it’s a holiday, for example, have participants draw things related to the holiday and discuss!
